

ELECTRONIC TENDERNESS
AESTHETIC CORRESPONDENCE
IN AN ELECTRO-TEXTILE SPACE
SHELL Sophie Stephanie Kellner
2018

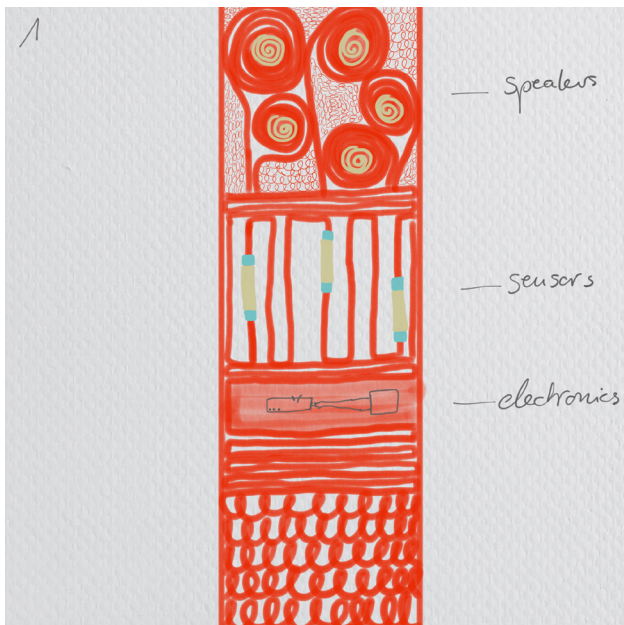

Taken out of the interpretation of the electronic living space of today's ,high-tech' society the vision for a future **technical and tender space** is created: the acting persons of an electro-textile space installation are encouraged to **playfully** interact with the materials.

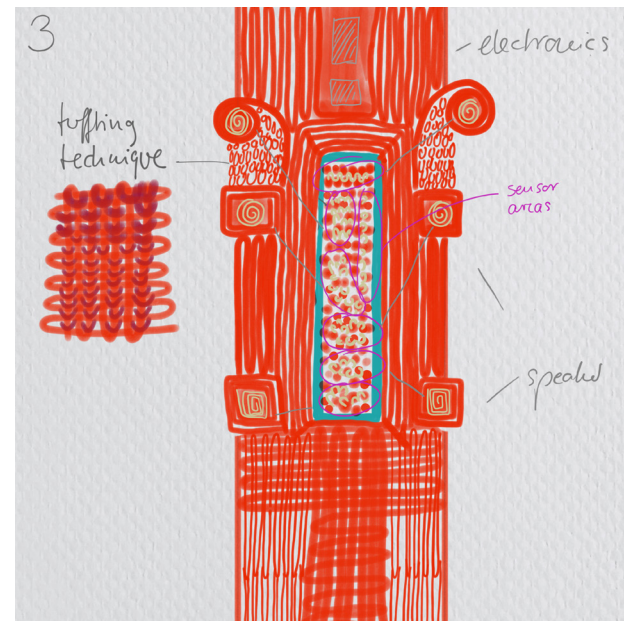

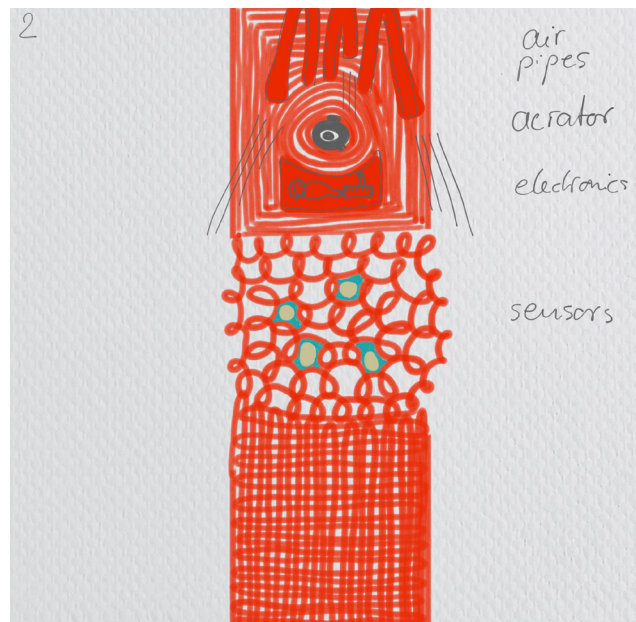

ELECTRONIC TENDERNESS CONCEPT

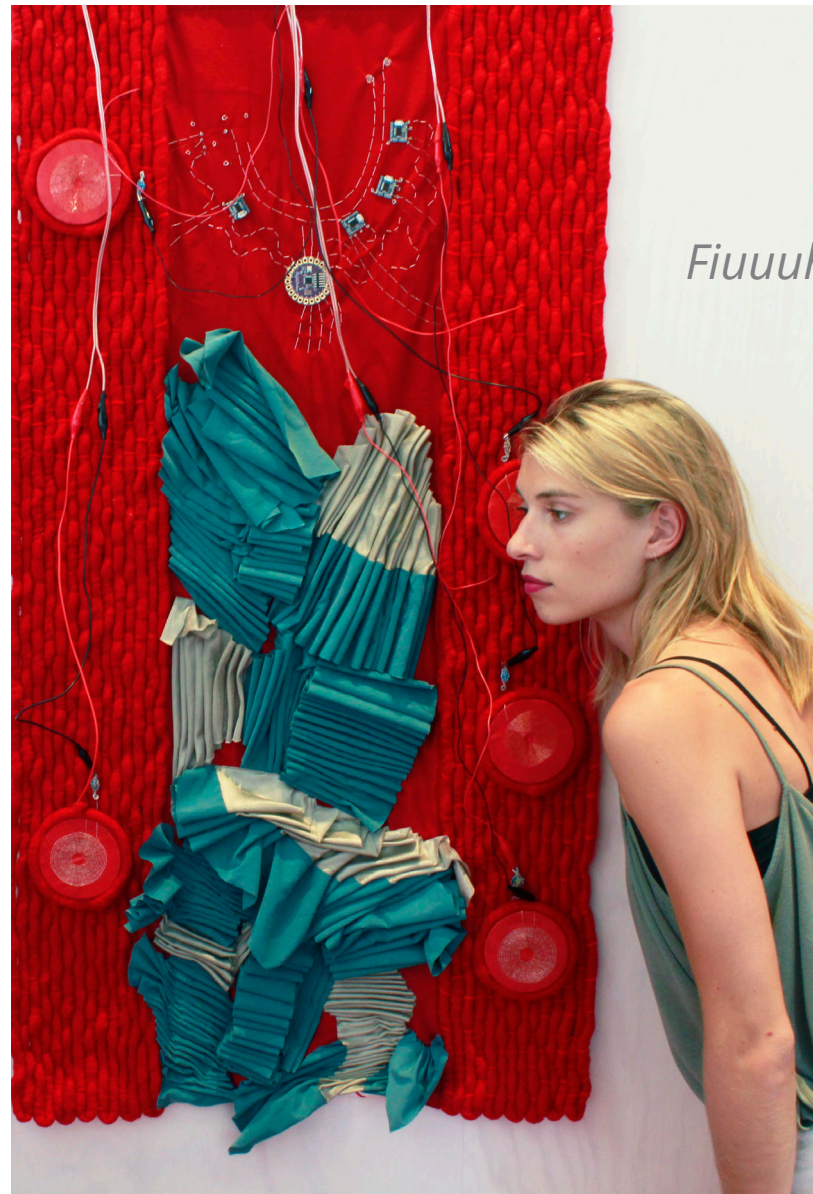

Textile hand work and industrial mass products converge and thus propose a new aesthetic of an omnipresent electronic. Electronic becomes **haptically** diverse, a **sensually** new experience and thus a more conscious perception.

ELECTRONIC TENDERNESS DRAWINGS

ELECTRONIC TENDERNESS **SPACE SHELL**

Fiuuuhhh.....hah!

Sound Space Shell with capacitive sensor area and stiched textile speakers.

ELECTRONIC TENDERNESS SPACE SHELL

Textile electronic circuit. You can just clip it on and off.

Breeze textile: stroke it tenderly and it will give a gentle breeze in return.

Finding out where the textile likes to be touched and what kind of sound comes in response.

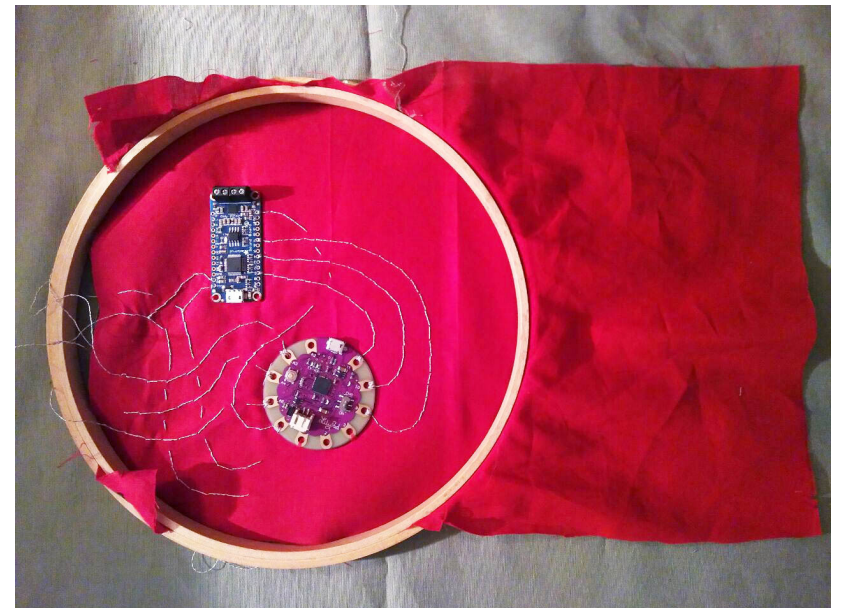

ELECTRONIC TENDERNESS **SPACE SHELL**

Huuh!

How delightful it is to explore the ups and downs of this textile "garden" with your feet.

Sewing a textile circuit with conductive yarn, soundboard and microcontroller.
